

BASIC CHECK-UP

“Healthy Child”
(from 1 year old)

- Does your child often feel tired, become irritable, or complain of feeling unwell?
- Are you concerned about their readiness for kindergarten or school?

A valuable investment in your child's future!
Learn everything about their health as
quickly as possible with a comprehensive
Check-Up completed in just 1-2 days.

Early detection is the key to healthy growth!

Who is this Check-UP recommended for?

- Recommended for children aged 1 year and older who need regular medical check-ups.
- For parents who want to make sure their child is developing properly.
- For children preparing for kindergarten, school, or sports activities.

What is included in the Check-UP?

Medical examinations

Laboratory tests

Conclusion and personalized recommendations

What is included in the Check-UP?

Pediatrician consultation – examination, assessment of growth and development, and personalized recommendations.

- Complete Blood Count (CBC) and Urinalysis — basic tests used to assess overall health and help detect signs of inflammation, anemia, infection, and possible urinary system disorders.
- ALT and AST — indicators used to assess liver function.
- Glucose — an important test for assessing carbohydrate metabolism and screening for diabetes.

Stool Tests:

- Coprogram (stool analysis) — assessment of digestive function and the functioning of the stomach, pancreas, and intestines. Helps identify possible problems with food digestion and absorption.
- Stool test for helminth eggs and protozoan cysts — helps detect intestinal parasites.

“Healthy Baby” Check-UP — peace of mind and confidence for parents!

Advantages:

- ✓ Comprehensive examination in 1-2 days – no queues or unnecessary waiting.
- ✓ Early detection of potential health issues – keeping your child's health under control.
- ✓ Readiness for kindergarten or school – confidence in your child's health and development.
- ✓ Recommendations from leading specialists – clear guidance for parents on what to do next.
