

BASIC CHECK-UP

Women's Health

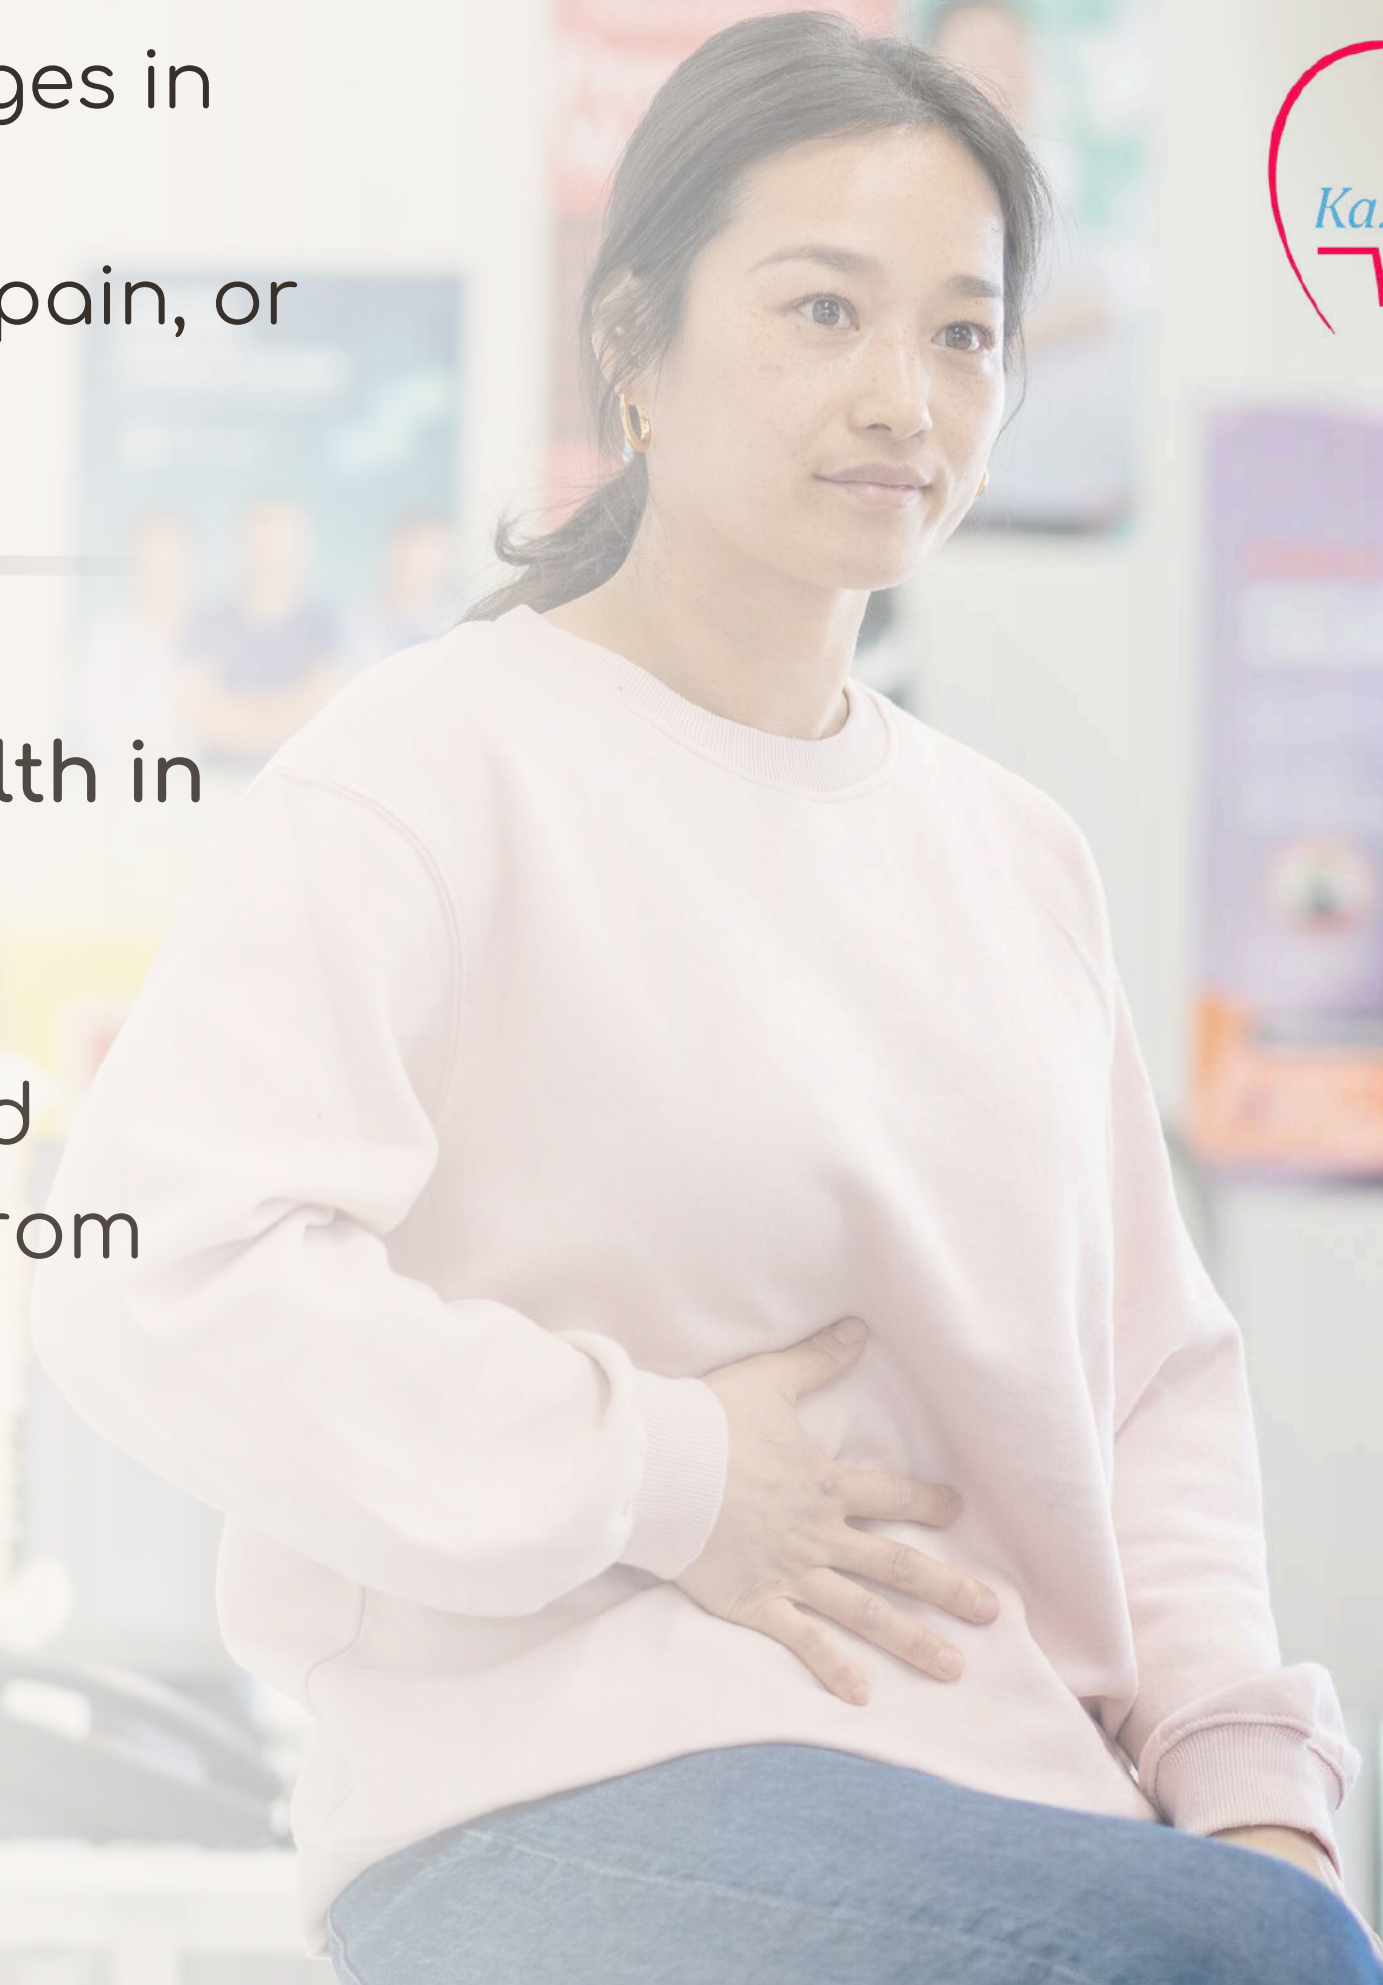

- Have you noticed any discomfort or changes in your women's health?
- Are irregular periods, hormonal changes, pain, or other symptoms bothering you?

Get valuable information about your health in just 1 day.

Complete a comprehensive Check-Up and receive personalized recommendations from your doctor.

Don't put off taking care of your health!

Who is this Check-Up recommended for?

- Irregular menstrual cycles — if you frequently experience cycle irregularities or hormonal changes.
- Pregnancy planning — if you want to assess your reproductive health.
- Pain or discomfort — if you experience pain or discomfort in the pelvic area.
- Preventive care — if you want to undergo a routine examination to monitor your health and help detect potential problems early.

What is included in the “Women’s Health” Check-Up?

Doctor’s Examination

Laboratory Tests

Instrumental Diagnostics

Conclusion and Personalized Recommendations

What is included in the Check-Up?

Gynecologist Consultation — examination, assessment of symptoms, and personalized recommendations.

Pelvic Ultrasound — helps detect inflammatory changes, cysts, fibroids, and assess the condition of the endometrium and ovaries.

Tests:

- Vaginal smear for flora — assessment of vaginal microflora and signs of inflammation.
- Cervical cytology (Pap test) — screening for early cervical cell changes and cervical cancer.
- HPV test — detection of high-risk human papillomavirus (HPV) types associated with cervical cancer.
